

GDPR – General Data Protection Regulation

📌 Course Aim

This training course refers to GDPR – General Data Protection Regulations.

The GDPR builds on and replaces existing data protection law and aims to strike the right balance between the rights of individuals and the interests of those with legitimate reasons for using personal information.

Organisations can face unlimited fines and individuals can even be sent to prison. So it is really important that we make sure that we always deal with people's data in the right way. One of its aims is to provide standardised data protection laws across Ireland and the entire EU.

📌 Client Profile

This one day training course is suitable for any individual or business running a website, carrying out marketing activities, handling customer payments and providing customer service at their place of work or business.

📌 Client Objectives

By the end of this GDPR Data Protection training course you will be able to:

- Outline the data protection principles outlined in the GDPR and apply these principles as appropriate.
- Identify 'Personal data' and 'Special categories of Personal Data' and their processing conditions
- Outline the rights of individual data subjects found in the GDPR
