

## Hazard Analysis & Risk Assessment

### ◆ Course Aim

The aim of this training course is to provide employers with the necessary skills & information required to manage safety and health at work so as to prevent accidents and ill health. Controlling dangers at work is no different from tackling any other task. You need to recognise the problem, know enough about it, decide what to do and put the solutions into practice.

### ◆ Client Profile

Anyone who is required to carry out Risk Assessments in their pace of work.

### ◆ Course Outline

#### Identifying Hazards

- Physical
- Health
- Chemical
- Biological
- Human-Factor

#### Assessing the Risks

- Who should carry out the Risk Assessment?
- Is there a formula that can be used to carry out Risk Assessment?
- What factors affect the level of Risk?
- Who do I need to consider?

#### Deciding on Precautions and Controlling Risk and Recording the findings
